DETAILED ACTION

Response to Arguments

Applicant's arguments, see amendment filed July 30, 2004, with respect to the rejection(s) of claim(s) 1-4 under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. patent 6,317,832.

Claim Objections

Claims 1-4 are objected to under 37 CFR 1.75 (b). Claims 1 and 3 do not differ substantially from each other nor does claims 2 and 4.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2137

Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9 and 10 of U.S. Patent No. 6,317,832. Although the conflicting claims are not identical, they are not patentably distinct from each other because every element of claims 1 and 3 of the instant application is contained in claim 9 of patent 6,317,832 and therefore is anticipated by claim 9. Claim 9 of the patent is a method for securely loading applications onto an IC card after determining that the card is qualified to accept the loading of the application. For claims 2 and 4, every element of the instant application is contained in claim 10 of patent 6,317,832 and therefore is anticipated by claim 10. Claim 10 of the patent is a method for securely deleting applications from an IC card after determining that the card is qualified to accept the deleting of the application.
